AX BILLY Ague Cure

FOR THE SPERCE CIME BY Intermittent Fever or Fever and Agae, Remittent Fever, Chill Fever, Dumb Ague, Periodical Heodache, or Biliona Hoadache, and Bilious Fevers; Indeed for the whole Class of Diseases originating in biliary derangement, caused

by the Malaria of miasmatic countries. No one remedy is londer called for by the ne-

No one remedy is londer called for by the facesition of the American people than a sore and male cure for Fever and Ague. Such a remedy we are now enabled to ofter, with a perfect certainty that it will eradicate the discuss, and with assurance, founded on proof, that no harm emaries from its use in any quantity.

That which protest from or prevents this disorder must be of immones cervice in the communities where it prevails. Preventors is better than cure, for the patient cuspes the risk which he must run in violent attacks of this baleful distemper. This "Ctum" expels the missimatic poison of Faven and Acts from the system, and prevents the development of the disease, if taken on the first approach of its permitterly symptoms. It is not only the better mady ever yet discovered for this class of compalaints, but also the chespest. The large quantity we supply for a dollar brings it within the reach of every body; and in billows district, where Favera axa Acus prevails, every bedy should have it, and use it freely, both for cure and protection. It is hoped this price will place it within the ceach of all—the poor as well as the rich. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of intermittents is, that it contains no Quinine or mineral, consequently it produces me quinism or other injurious effects whatever upon the constitution. Those cured by it ever left as healthy as if they had never had the disease.

left as healthy as if they had never had the disease.

Fever and Agas is not alone the consequence of the miasmatic poison. A great variety of disorders arise from its irritation, smong which are Neuragia, Rhenmatism, Gout Headache, Blindness, Toothache, Earache, Camerh, Asthum, Palpitation, Painful Affection of the Spleen, Hysterica, Pain in the Bowels, Colic, Paralysis, and Derangement of the Stemach, all of which, when originating in this cause, put on the informittent type, or become periodical. This "Cinn" expels the poison from the blood and consequently erres them all alike. It is an invaluable protection to immigrants, and persons travelling or temporarily-westelling in the malarious districts. If asken occasionally, or daily, while exposed to the infection, that will be excreted from the system, and cannot accumulated in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will ever safter from Intermittents, if they avail themselves of the protection this run-edy affords.

Ayer's Cathartic Pills, FOR ALL THE PURPOSES OF A FAMILY PHYSIC

FOR ALL THE PURPOSES OF A FAMILY PHYSIO are so composed that disease within the range of their action can racely withstand or evade them. Their penetrating properties scarch, and cleanse, and invigorate every portion of the human or ganism, correcting its diseased action, and restoring its healthy vitalistics. As a consequence of these properties, the invalid who is lowest down with pain of physical deality is actionished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they care the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish greats toy American Almanac, containing extificates of their cares and directions for their man in the following complaints: Conferency Heavison, Headance arising from discretions for their pares and directions for their pares and other kindred compaints, arising room a law and for Arisin a Prizia, and take more profit on. Asi for Arisin a Prizia, and take more profit on.

FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Disease.

So wide is the field of its usefulness, and so unmerous are the cases of its raires, that almost every section of country abounds in persons publicly known, who have been restored from adarming and over desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hastate what antidote to employ for the distressing and dangerous affections of the pulmouser organis that are incident to our climats. While many infarire retardles thats upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
